## *Integrated Landscaping: Following Nature's Lead*

Price: \$24.00

Following Nature's Lead is for gardeners, landscapers, businesses, and municipalities that want to create beautiful, functional landscapes based on natural ecosystems. While most landscape manuals describe a linear sequence of processes: design, plant selection, installation, and maintenance, Integrated Landscaping offers a holistic approach that addresses these processes simultaneously. This new way of thinking treats each site as a system of plant and animal communities, considering their interrelationships to each other and their environment.

Written for New Hampshire and the other Northeastern states, Following Nature's Lead will help you to:

- Establish landscapes that look and feel as if they belong here.
- Integrate natural principles into beautiful, functional landscapes.
- Create landscapes that sustain themselves with minimum cost, energy, and effort.
- Think in terms of plant systems, rather than mere collections of individual plants, even for challenging conditions.
- Create landscapes that benefit wildlife, both above and below ground.
- Offer aesthetic alternatives to invasive species.

## **Landscaping at the Water's Edge An Ecological Approach**

Price: \$19.95

No matter where you live in New Hampshire, the actions you take in your landscape can have far reaching effects on water quality. Why? Because we are all connected to the water cycle and we all live in a watershed, the land area that drains into a surface water body such as a lake, river, or wetland.

"Landscaping at the Water's Edge: An Ecological Approach" is a new publication for New Hampshire landowners and landscapers that will explain how our landscaping choices impact surface and ground waters and demonstrates how, with simple observations, ecologically-based design and low impact maintenance practices, you can protect, and even improve, the quality of our water resources.

## **The Best Plants for New Hampshire Gardens and Landscapes**

Price: \$12.95

How to Choose Annuals, Perennials, Small Trees & Shrubs to Thrive in Your Garden uses the concept of habitat gardening to help gardeners and landscapers choose and care for plants in our unique New Hampshire environment.

The 96-page publication includes:

- Lively, easy-to-read text and useful charts
- Pen and ink illustrations, and black & white photos of selected plants
- Sections on plant selection and care
- Specialty plant lists and an index for easy referencing

## **Turf Integrated Pest Management (IPM)**

*Interactive CD on Lawn Care*

Price: \$5.00

Interested in getting a greener, healthier lawn and having fun learning how?

Integrated Pest Management for Turfgrass, an interactive CD and website about caring for grass in home lawns, as well as in municipal and commercial landscapes such as athletic fields, cemeteries, golf courses and office parks.

The CD and website offer information on the basics of integrated pest management, how grass grows, identifying and managing turf diseases, scouting for grubs, an herbicide glossary, and interactive decision tools about herbicide use. Quizzes at the end of each section will test your knowledge.
