

Souhegan River Local Advisory Committee

Members of the Souhegan River Local Advisory Committee (SoRLAC) serve as stewards over activities in the Souhegan River Watershed. Members represent business, recreation, agriculture, and conservation interests as well as riparian landowners and local government. Communities in the Souhegan River Corridor include Amherst, Bedford, Lyndeborough, Merrimack, Milford, Greenville, New Ipswich, Temple, and Wilton. Information about SoRLAC is available at www.nashuarpc.org/SRLAC.

The Souhegan River Watershed Management Plan was prepared by NRPC on behalf of SoRLAC. The Plan is available for download at www.nashuarpc.org/SRLAC.

Souhegan River Watershed

The River

The 34-mile long Souhegan River is a pathway that connects communities and provides year-round recreation to swim, fish, paddle, walk along, and enjoy scenic views. The river adds to quality of life to residents and visitors alike. Flowing through several town centers, the river provides a sense of history, a connection to nature, and a diverse set of economic opportunities.

The Watershed

The Souhegan River Watershed occupies approximately 220 square miles spanning seventeen communities in New Hampshire and Massachusetts. The Souhegan River Watershed Management Plan (SRWMP) analyzes the River at the watershed scale, which allows for water resource goals to be realized across community boundaries in an ecologically sound manner.

The Plan

Creating the SRWMP was the first step in the process of protecting the Souhegan River Watershed under the NH Rivers Management and Protection Program. The Plan identifies watershed

conditions, priority management issues, and contains recommendations on ways local officials, state government, concerned citizens, and volunteer groups can help protect the river resource.

Moving Forward

Formal adoption of the Plan by watershed communities is the next step toward fully implementing the Plan. Once incorporated into each watershed community's Master Plan, recommended management strategies will become part of a wide range of municipal management decisions that affect or involve the Souhegan River or its watershed.

The Souhegan in the Town of Milford

The Milford Fish Hatchery on the Souhegan River is one of six hatcheries operated by the NH Fish and Game Department, which together raise nearly a million trout each year for stocking in the state's ponds, lakes, rivers, and streams. Visitors are encouraged to the hatchery to learn how fish are hatched and reared:
